

CUT-IT 2.0 - WINDOW CUTTING SYSTEM

□

Description

Cut-it is the new technology about cutting out windows of vehicles. Based on wire technology the system works at one person use only. Windows are getting more and more complicated in shape and the gap between window and body frame are getting smaller down to 2mm. The Cut-it windshield removal system is designed that no interiors have to be removed. At correct application it is almost impossible to damage the window or the body frame where the window is glued. Windows with vulcanized rubber sealing can be removed without any damage.

Benefits

- Fast and easy separation of windows.
- Cutting system for glued windows
- one-man operation
- User-friendly handling
- No disassembly of the interior trim
- The paint is untouched
- Portable use / mobile use

Scope of delivery

- Cut-it Bridge with Suction Cup
- Deflection Pulley
- Cutting-wire
- Bodkin
- Safety goggles
- Case with Inlay
- User-Manual

Technical data

Drive	3/8"
-------	------

Dimensions & Weight

L x W x H	cm x cm x cm
Weight	3,85 kg
